**HDS Personal Device Registration Guide**

This registration is intended for devices that are unable to connect to KSU Housing or KSU Wireless. (Chromecast, Roku, Apple TV etc.)

---

### Step 1)

Navigate to cpradius.net.k-state.edu/guest/ and log in with your K-State eID and password; once logged in, select ‘Create’ to add a new device.

### Step 2)

Enter the name of your device and its wireless MAC address, which can be found either on the physical device or within the network settings. To grant access to additional users, proceed to step 3. Otherwise, complete registration here by selecting ‘Register Device’. 

*Note: Each eID is able to register up to 5 devices.*

### Step 3)

If you would like to connect to your device with other devices, such as a smartphone or a laptop, select ‘Enable AirGroup’. To share access with another resident, like a roommate, you can enter their eID here and they will also be able to connect to the device.

Once your device has been registered, you will see this confirmation message. You can now connect your device to the KSU Guest network. If you encounter issues while registering your device, call the ResNet Help Desk at 785-532-2711.
